

**Rule (A) 4 and Rules (C) 13, 23, 28 and 33 of the Rules of Racing
Restrictions on Substances Administered to, and Treatment of, Horses on
Racecourse Premises**

✓ **Normal feed (such as oats, nuts and other compound feeds, hay) and water, offered normally (such as in a bucket) are allowed at any time on racecourse premises.**

✗ **Do not bring into the racecourse stables any substance (other than normal feed and water) or any means of administration (such as syringes, oral applicators etc.) unless dispensation is obtained from the BHA Veterinary Officer.**

✓ **The BHA Veterinary Officer will consider individual requests on each raceday for dispensation to administer substances that are not prohibited (such as Glycerine given orally pre-race, electrolytes given orally after the race).**

✗ **No substance, including feed and water, may be administered by syringe, oral applicator or by any other method anywhere on racecourse premises unless dispensation is obtained from the BHA Veterinary Officer or the administration is treatment performed or directed by the Racecourse Veterinary Surgeon.**

Dispensation for each exception to these Rules must be obtained beforehand by trainers and their employees on each and every raceday from the BHA Veterinary Officer on duty.

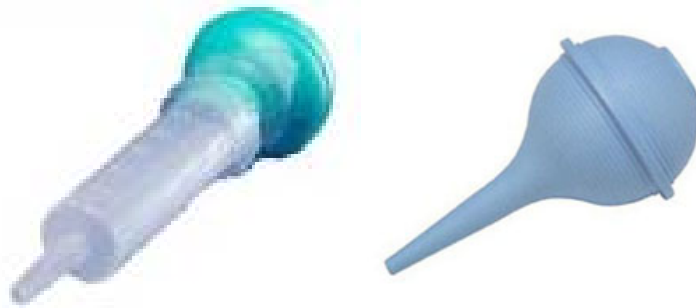

Contact the BHA Veterinary Officer directly, or via the Stable Security Office

An exception is that a general dispensation has been granted to possess and use bulb syringes to administer water to horses in small quantities whilst on racecourse premises.

**For further information on rules and penalties see
The Rules of Racing:
<http://rules.britishhorseracing.com>**
